Education

University of Pennsylvania (Philadelphia, PA), M.A. in Applied Mathematics, 2023 (expected).

Research Advisor: Eugene Katsevich and Bhaswar B. Bhattacharya.

Renmin University of China (Beijing, China), B.A. in Statistics, 2021.

Thesis Advisor: Wei Li.

Experience

Student academic research

Master student researcher, University of Pennsylvania (2021–2023).

I developed novel theory and methodology for (conditional) independence testing and high-dimensional inference problems. See [3].

Undergraduate student researcher, Renmin University of China, (2020–2021).

I designed, studied theoretically, and implemented a two-stage framework to conduct the causal inference for high-dimensional treatment allowing for unobserved confounding. See [2].

Undergraduate student researcher, University of College London, (2020–2021).

I proposed a novel method to boost the inference for intractable likelihood models with the Quasi-Monte Carlo method. See [1].

Fellowship and Awards

- SIAM Annual Meeting Student Travel Award (2021).
- Undergraduate Study Scholarship (2017-2019).

Professional Service Activities

- *Reviewer*, NeurIPS, Journal of Machine Learning Research.

Presentations

Invited Seminar Presentations

- *High-dimensional causal inference: estimation and inference for high-dimensional treatment in the presence of unobserved confounding.*
Data Mining Center of Renmin University of China, May. 28, 2021.

Contributed Conference Oral Presentations

- *Estimation and inference for high-dimensional nonparametric additive instrumental-variables regression.*
Chinese R Conference, Nov. 20–21, 2021, in Beijing, China.
ICSA-Canada Chapter Symposium, Jul. 8–10, 2022, in Banff, Canada. [Slides]

Conference Poster Presentations

- *Discrepancy-based Inference for Intractable Generative Models using Quasi-Monte Carlo.*
Lifting Inference with Kernel Embeddings, Jan. 10–14, 2022, online. [Video] [Slides]
SIAM Annual Meeting, Jul. 19–23, 2021, online. [Poster]
Paris AI Summer School, Jul. 5–9, 2021, online.

Mentorship

- Vikram Balasubramanian
Directed Reading Program, UPenn, Sep.–Dec., 2022.
- Alexandru Lopotenco
Undergraduate Research in Probability and Statistics, UPenn, Jan.–May., 2022.
- Ryan Jeong
Undergraduate Research in Probability and Statistics, UPenn, Jan.–May., 2022.
