Education

University of Pennsylvania (Philadelphia, PA), Ph.D. in Statistics, 2028 (expected).
Research Advisor: Eugene Katsevich and Bhaswar B. Bhattacharya.

University of Pennsylvania (Philadelphia, PA), M.A. in Applied Mathematics, 2023.
Research Advisor: Eugene Katsevich and Bhaswar B. Bhattacharya.

Renmin University of China (Beijing, China), B.A. in Economic Statistics, 2021.
Thesis Advisor: Wei Li.

Experience

Student academic research

Ph.D. student researcher, University of Pennsylvania (2023–now).

I have been developing novel theory and methodology for testing (conditional) independence and model calibration. I have also been working on more classical topics including *saddlepoint approximation*. See [6, 7, 8].

Master student researcher, University of Pennsylvania (2021–2023).

I developed novel theory and methodology for (conditional) independence testing and high-dimensional inference problems. See [3, 4, 5].

Undergraduate student researcher, Renmin University of China, (2020–2021).

I designed, studied theoretically, and implemented a two-stage framework to conduct the causal inference for high-dimensional treatment allowing for unobserved confounding. See [2].

Undergraduate student researcher, University of College London, (2020–2021).

I proposed a novel method to boost the inference for intractable likelihood models with the Quasi-Monte Carlo method. See [1].

Fellowship and Awards

- Lawrence David Brown Best Student Paper Award (2024).
Department of Statistics and Data Science at Wharton, UPenn.
- SIAM Annual Meeting Student Travel Award (2021).
Society for Industrial and Applied Mathematics.
- Undergraduate Study Scholarship (2017–2019).
Renmin University of China.

Professional Service Activities

- *Reviewer*, NeurIPS, JMLR, JASA, Bernoulli, JRSS-A, EJS.
- *Organizer*, ICSA-Canada Chapter Symposium (2024).
I organized and chaired the session "Topic in Combinatorial Inference", which included inviting speakers, coordinating the conference schedule with the speakers and hosting the session.

Presentations

Invited Seminar Presentations

- *Computationally efficient and statistically accurate conditional independence testing with spaCRT*
International Seminar on Selective Inference, Nov. 4, 2024. [[Slides](#)]

Contributed Conference Oral Presentations

- *Detect model miscalibration via your nearest neighbor*
Bernoulli-ims 11th World Congress in Probability and Statistics, Aug. 12-16, 2024, in Bochum, Germany. [[Slides](#)]
- *A reconciliation between finite-sample and asymptopia-based methods in conditional independence testing*
Lawrence David Brown student workshop, Mar. 22, 2024, in Philadelphia, USA. [[Slides](#)]
Joint Statistical Meeting, Aug. 5-10, 2023, in Toronto, Canada.
- *Inference for ATE using heterogeneity: generalized 2SLS and double machine learning perspectives*
Statistical Society of Canada Annual Meeting, May 28-31, 2023, in Ottawa, Canada.
- *Discrepancy-based Inference for Intractable Generative Models using Quasi-Monte Carlo.*
Lifting Inference with Kernel Embeddings, Jan. 10-14, 2022, online. [[Video](#)] [[Slides](#)]
- *Estimation and inference for high-dimensional nonparametric additive instrumental-variables regression.*
Chinese R Conference, Nov. 20-21, 2021, in Beijing, China.
ICSA-Canada Chapter Symposium, Jul. 8-10, 2022, in Banff, Canada. [[Slides](#)]

Conference Poster Presentations

- *Discrepancy-based Inference for Intractable Generative Models using Quasi-Monte Carlo.*
SIAM Annual Meeting, Jul. 19-23, 2021, online. [[Poster](#)]
Paris AI Summer School, Jul. 5-9, 2021, online.

Mentorship

- Vikram Balasubramanian
Directed Reading Program, UPenn, Sep.-Dec., 2022.
- Alexandru Lopotenco
Undergraduate Research in Probability and Statistics, UPenn, Jan.-May., 2022.
- Ryan Jeong
Undergraduate Research in Probability and Statistics, UPenn, Jan.-May., 2022.
